

The improvement of the principles of fertilization of winter wheat on the basis of data base AIIR B. AKÓCSI, M. BUZÁS, Z. K. HORVÁTH, I. SZABADOS and L. NASZÓDI . . . . .	333
The complex evaluation of soil fertility evolution and of its cultivation degree in long-term amelioration and fertilization T. A. GRINCHENKO and A. A. EGORSIIN . . . . .	337
Some mathematical problems connected with regression techniques and used in yield modelling N. TODOROVA . . . . .	340
Instrumentation of fertilization advisory stations G. HARSÁNYI . . . . .	343
Influence of long-term fertilization on the quality and quantity of clay minerals in soils J. RÓZSAVÖLGYI, I. KÁDÁR and J. SARKADI . . . . .	346
A method of pH measurement in soil systems eliminating the suspension effect J. STAWINSKI, J. WIERZCIIOS and G. JOZEFACIUK . . . . .	351
Model for the estimation of the optimum nitrogen fertilization of winter wheat based on the mineral nitrogen content of soil, condition of wheat development, climate region, yield expectation and price/cost ratio A. RASINGER . . . . .	354
Urease activity and its kinetic properties in saline soils RADHI K. AL-RASHIDI . . . . .	357
Necessity and possibilities for a uniform nitrogen supply G. J. KOVÁCS . . . . .	363
Rapid test for the determination of the nitrogen fertilizer requirements of cereals W. PODLESÁK, H. P. VIELEMEYER and J. JAKOB . . . . .	367
Recommended values for liming of arable soils in the GDR M. KERSCHBERGER, W. PODLESÁK and D. RICHTER . . . . .	370

#### WORKING GROUP 10

Plant nutrient application. Inorganic and organic fertilizers and plant bio-regulators. Transportation, storage, distribution and economical aspects of fertilizers. . . . .	373
Report of the Coordinator G. d. BEAUCORPS . . . . .	374
The influence of soil properties and fertilization on winter wheat yield in Hungary I. PATÓCS, G. KOVÁCS, J. KARLINGER, A. FEKETE and L. NASZÓDI . . . . .	375
Nutrient uptake and fertilization of hemp I. ALBERT . . . . .	378
Fertilizer responses of groundnuts / <i>Arachis hypogae</i> L. / under continuous intensive cultivation in the Nigerian Savannah G. LOMBIN and L. SINGH . . . . .	381
Effects of chemical fertilization on the nutrient uptake and crop of the Spanish red / <i>Espanola roja</i> / variety of pineapple H. PENA ARDERI and B. DEBRECZENI . . . . .	389
Dynamics of mountain meadow yields during a 14-year period of a fertilization experiment K. MAZUR and T. MAZUR . . . . .	392
