

Sulphur, magnesium and micronutrients and their role in plant nutrition B. A. YAGODIN . . . . .	221
Fertilizers in maximum-yield systems A. VON PETER . . . . .	233
<i>Contributions</i>	
Micronutrient availability as affected by some soil factors M. SILLANPÄÄ . . . . .	253
Solid industrial wastes as a source of the microelements Mo, Cu and Mn for agriculture and the fertilizer industry T. WOLSKI and J. GLINSKI . . . . .	259
Micronutrient problems in high-yield grain cropping A. FINCK . . . . .	263
The use of potassium sulphate in France and the agricultural theory behind it C. FRICKER . . . . .	269
The effects of superphosphate on irrigated wheat crops V. HERNANDO FERNANDEZ and R. GONZÁLEZ PONCE . . . . .	271
Scientific problems concerning potassium fertilization in Bulgaria M. MILCHEVA . . . . .	275
The optimal parameters of supplying soddy podzolic soils with phosphorus and potas- sium T. N. KULAKOVSKAYA and L. P. DETKOVSKAYA . . . . .	279

#### WORKING GROUP SESSIONS AND POSTER SESSION

##### Working group 1

Subject: Water resources for plant production. Interaction between water (irrigation and nutrient supply (fertilization) (16 contributions)

Coordinator: L. VERMES

##### Working group 2

Subject: Biological nitrogen fixation. Applications in agriculture and forestry (10 contributions)

Coordinator: C. RODRIGUEZ BARRUECO

##### Working group 3

Subject: Use of nitrogen in agriculture and forestry in relation to yield improvement and environmental pollution (46 contributions)

Coordinator: A. AMBERGER

##### Working group 4

Subject: Phosphorus supply in agriculture and forestry. Raw material, fertilizer production and use, fixation in soils, recycling and pollution in developed and in developing countries (31 contributions)

Coordinator: B. DEBRECZENI

##### Working group 5

Subject: Potassium supply in agriculture and forestry. Raw materials, fertilizer production and use, fixation in soils and recycling (16 contributions)

Coordinator: H. BERINGER
