

INVITATION

We consider it a great honour to Hungarian science that the 9th World Fertilizer Congress of C.I.E.C. will be held in Budapest, 11—16 June 1984. The theme of the Congress "Fight Against Hunger Through Improved Plant Nutrition" is especially timely in our age when malnutrition is a great problem in many countries of the world.

Hungarian agriculture has made a great progress during the past twenty-five years. This progress has had several factors of which international scientific and technological relations, ranging from information exchange to the purchase of know-how and licences, have been of great significance. One of the key problems of the further development of agricultural production, too, is the widening of relations between individuals, organizations and various nations on the basis of mutual respect and advantages. We do hope that the 9th World Fertilizer Congress of C.I.E.C. will contribute to the broadening of scientific and friendly relationships.

Our friends are welcome in Hungary!

A handwritten signature in black ink, which appears to be "I. Lang". The signature is written in a cursive style with a large initial "I" and a long horizontal stroke.

Academician Prof. Dr. I. LÁNG
President of the
9th World Fertilizer Congress,
Deputy Secretary General of
the Hungarian Academy of Sciences
