
 June 26, Saturday

11.00 a.m.—1.00 p.m. CONCLUSIVE PLENARY SESSION

Theoretical principles of fertilization

L. GACHON, France

Izotopes in soil fertility and plant nutrition studies

G. BRUSCHAR, Austria

Chemization of agriculture and environment control (the present state, perspectives and international coordination of researches in pollution of environment with chemicals)

I. I. SINYAGIN, USSR

1.00 p.m.

Congress Closing Ceremony

7.00 p.m.

Reception

INTERNATIONAL EXHIBITION
"Agrochemistry-76"

International specialized exhibition - "Agrochemistry-76" timed for the VIII International Fertilizer Congress will be held in Moscow on the territory of the Exhibition of Economic Achievements from June 17 to 28, 1976. It will assist Soviet and foreign businessmen in establishing contacts, broadening trade relations and in exchanging scientific and technical knowledge.

The exhibits will include instruments and equipment for the production of fertilizers, specimens of fertilizers and other means of chemization.

Much space will be given to machines, equipment and facilities for transportation and storage of fertilizers.

Some of the largest research and designing organizations will contribute for display machines, mechanisms and implements for the application of fertilizers.

Specialists will find many interesting things in the Exhibition section "Agrochemical Laboratories, Equipment, Instruments, Reagents",
