

- B. Radenovic Yugoslavia -- Influence of different doses and ratios of nitrogen, phosphorous and potassium on yield and quality of sunflower growing on irrigated soils

11.30 a.m.—11.45 a.m. Recess

- J. Hohola Czechoslovakia — Influence of mineral fertilizer on quality of sugar beet
 J. Prugar Czechoslovakia
 Y. Kartsev USSR
 R. Jauert DDR
 I. Buzas Hungary
 S. Dragovic Yugoslavia -- Effect of mineral fertilizer on quality of sugar beet growing on irrigated soil
- S. Stanachev Yugoslavia -- Effect of mineral fertilizers on yield and quality of sugar beet
- E. A. Tonkal USSR -- Effect of mineral fertilizers on sugar content and technological properties of sugar beet
- Z. Popovic Yugoslavia Influence of nitrogen doses and plant number on the yield of sugar beet
 M. Pantovic
 Dj. Kronic
 D. Ljesov

3.00 p.m.—6.00 p.m. EVENING SESSION

Reports

- E. Kolota Poland Influence of fertilization on the yield and mineral composition of cabbage in the conditions of different soil moisture levels
- D. Fritz BRD -- Molybdenum fertilization affecting the nitrate content and the storage-ability of cauliflower (*Brassica oleracea* L. convar *Botrytic* (L.) Alef, var. *Botrytis* L.) cultivated in growth chambers
